Wash your hands

Wash your hands with
soap and running water
when **hands are visibly
dirty**

If your **hands are not
visibly dirty**,
frequently clean them
by using alcohol-based
hand rub or soap and
water

Protect yourself and others from getting sick

Wash your hands

- after coughing or sneezing
- when caring for the sick
- before, during and after you prepare food
- before eating
- after toilet use
- when hands are visibly dirty
- after handling animals or animal waste

Guide by:
Mrs. Sangita
Vaghasia (i/c
H.O.D.)

Co-ordinators:
Mr. Pratik Bagul
Ms. Mrigaya Desai

Student Co-
ordinators:
Hinal Mangukiya
Priyanshi Vekariya
Hetvee Panchigar

Protect others from getting sick

When coughing and sneezing
cover mouth and nose with
flexed elbow or tissue

**Throw tissue into closed bin
immediately after use**

Clean hands with alcohol-based
hand rub or soap and water
after coughing or sneezing and
when caring for the sick

Protect others from getting sick

Avoid close contact when you
are experiencing cough and fever

Avoid spitting in public

If you have fever, cough and
difficulty breathing **seek medical
care early** and share previous travel
history with your health care provider

SSIP, GUJARAT.

Government of Gujarat has developed a policy for providing assistance to Startups/ Innovation. Under this scheme, any individual/ group of individuals having innovative idea/ Concept will be eligible and/ or Universities/ education institutions, Incubation Centre/ PSUs/ R&D Institutions/ Private and other establishments will be eligible as an institution to support and mentor to innovators as approved by Committee. Startups in an economy's technology sectors is an important indicator of technological performance for several reasons.

http://www.ssipgujarat.in/a_about_ssip

IDEATHON COVID-19 TECH SOLUTION

PRACTICES TO IDEATE AND
COLLABORATE
ON POSSIBLE SOLUTIONS

- Possible technical solutions to protect Face from the viral infection.
- Application based or any other technical solution to fight against COVID-19.
- Technology or software based support for medical personnel and Governing authorities who are struggling to fight against COVID-19.

Student Startup and Innovation Policy

IDEATHON COVID-19 TECH SOLUTION

We heartily congratulate our students on their achievements in the
IDEATHON COVID 19 TECH SOLUTION COMPETITION

FIRST PLACE:DISINFECTION TUNNEL

5	186150350042	PATEL VRUNDA
	MENTOR	PRATIK MAHENDRA BAGUL

CONCEPT

Designing a economical low maintenance disinfectant tunnel for residential societies and public buildings.

Objectives:

1. To disinfect people while returning back from their workspace to their residences.
2. To disinfect people while they enter any public building.
3. To identify people with temperature.
4. To stop the spread of COVID 19 infection from one person to many more inside residential or public premise.
5. To design a low maintenance system.
6. To design a economically affordable system.

BENEFICIARIES

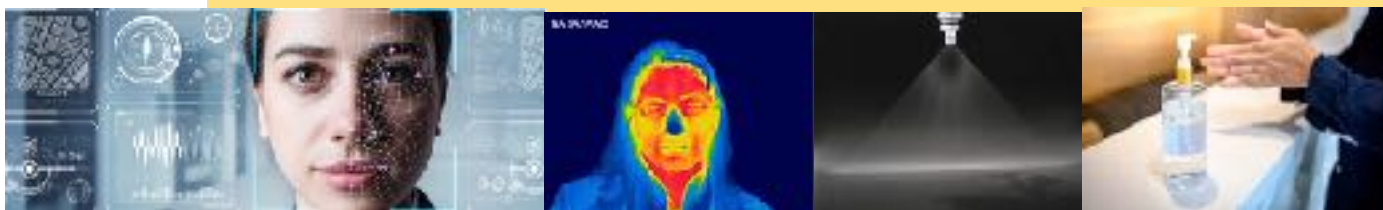

People residing in the residential societies.

People working in public buildings.

IMPLEMENTATION:

This integrated four stage system can be installed at the main entrance of the premises of any residential or public institution .

FOUR STAGE DISINFECTION TUNNEL

1.Face Recognition

- For security reason no unauthorized person would be allowed inside the premises.
- To avoid that face recognition device would be installed.

2.Infrared Thermometer

- A symptom of infected COVID 19 being temperature, an infrared thermometer would be the second stage of the tunnel.
- So that a person is found with a certain temperature can be sent to a testing lab immediately.

3.Sodium Perchlorate Disinfection Spray

- To disinfect a person a device is installed to spray Sodium Perchlorate Solution.

4.Sanitizer / hand wash

- As it's very important to wash hands as they are the one that can be in contact with your eyes, mouth and nose, a hands sanitizer is installed at the end.

CONCEPT

SOCIAL DISTANCING is the key to stop COVID 19 spread, but in many densely populated residential areas are in grave threat as people have to gather in store to buy essential items.

Many stores succeeded abiding social distancing but common people suffered long hours of waiting in a high risk situation of getting infected.

Many stores couldn't keep up with social distancing with heavy inflow of customers at any given point of time.

Food Chain is basically a system to manage people who wants to buy from grocery store or medical store for a given time frame using IOT.

There are 3 category of people based on how essential items are received :

1. People using online delivery apps.
2. People using RATION CARD.
3. People going to grocery stores and medical stores themselves to get essential food and medical items

PROBLEM IDENTIFICATION:

There is not a distribution system available in Indian cities and town where we can send essential items to each doorsteps.

At any given time store keeper cannot control or anticipate a number of people coming to store.

Now category 2 and 3 people are most vulnerable and have high chances to get COVID 19 infection while going at grocery or medical stores.

We need to consider that even if social distancing of 1 meter distance is practiced there is still chances that people can get the infection, when people get together in a large number at grocery stores for long period of time.

So, the whole concept is to design **TIME SPECIFIC GOODS DISTIBUTION SYSTEM based on IOT**
Challenges of Essential item Stores:

1. Very difficult to monitor/control people crowding at a given moment at the essential item stores.
2. High risk of COVID-19 spread.
3. Very inconvenient for each age group people to wait for long hours.
4. Time consuming activity.
5. Not practical once lockdown will be lifted.

BENEFICIARIES

People going to Grocery stores in cities/towns/villages.

People going to medical stores in cities/towns/villages.

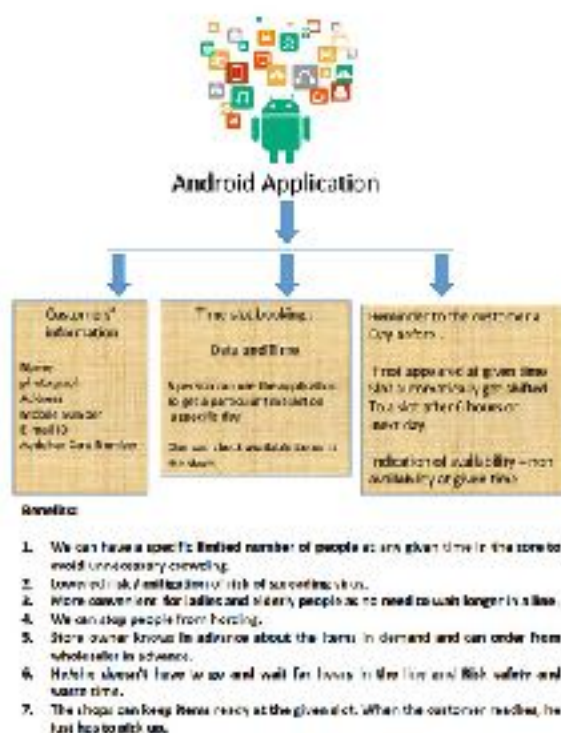

People going to LPG cylinder agencies in cities/towns/villages.

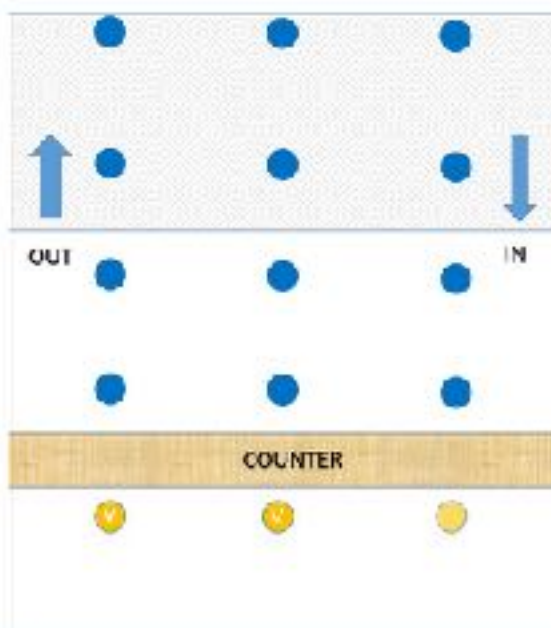

TITLE of CONCEPT IOT FOOD CHAIN

IMPLIMENTATION

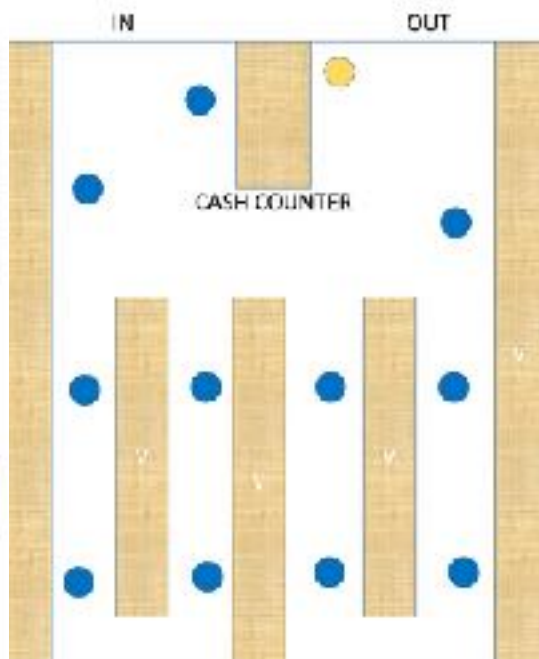

GRAPHICAL REPRESENTATION

20-25 Square meter shop
6-8 people inside
As per booked time slot
Keeping 2 meter- 6 feet distance between them

15-50 Square meter shop
10-12 people inside the store
as per booked time slot
Keeping 2 meter- 6 feet distance between them

DO NOT USE THE CONTENT OF DISINFECTION TUNNEL AND IOT FOOD CHAIN WITHOUT PERMISSION OF THE TEAM MEMBERS AND MENTOR.

The Pritzker Architecture Prize

Balkrishna Doshi
Pritzker Prize Laureates: 2018

Purpose

To honor a living architect or architects whose built work demonstrates a combination of those qualities of talent, vision, and commitment, which has produced consistent and significant contributions to humanity and the built environment through the art of architecture.

The international prize, which is awarded each year to a living architect/s for significant achievement, was established by the Pritzker family of Chicago through their Hyatt Foundation in 1979. It is granted annually and is often referred to as “architecture’s Nobel” and “the profession’s highest honor.”

The award consists of \$100,000 (US) and a bronze medallion. The award is conferred on the laureate/s at a ceremony held at an architecturally significant site throughout the world.

Help prevent the spread of respiratory diseases like COVID-19

WASH YOUR HANDS

Wash your hands with soap and warm water regularly.

COVER A COUGH OR SNEEZE

Cover your cough or sneeze with your sleeve, or tissue. Dispose of tissue and wash your hand afterwards.

DON'T TOUCH

Avoid touching eyes, nose or mouth, especially with unwashed hands.

KEEP YOUR DISTANCE

Avoid close contact with people who are sick.

STAY HOME

If you experience respiratory symptoms like a cough or fever, stay home.

GET HELP

If you experience symptoms of COVID-19 (cough, fever, shortness of breath), call your health care provider.

ENVIRONMENT PROTECTION & ECO-FRIENDLY PRACTICES

Climate Change is the biggest threat to our mother earth in the 21st century. Environment protection is the most important agenda in the world these days. We have seen younger generation coming forward and participate in this globally and most importantly when each human being will be well aware, informed, educated and a practitioner of eco- friendly lifestyle, then only we could change our present day scenario and will leave behind a better future for the next generation. We are happy to share one such effort done by our student, who made a beautiful clay Ganesh idol. We feel immense proud when we see such a sensible, aware and thoughtful student of ours practicing such eco-friendly approaches. Such young students are inspiration for others and the bright future of our nation.

“This Ganesha idol is made of raw earth (natural soil) and plain clay which is not mixed with chemicals. It is just mud and water. This, when immersed in water or let to nature, just get dissolved without releasing any toxic materials. Ganesha idols made of Plaster Of Paris are attractive, cheap and easy to make, but they can do a lot of harm to your health and the environment at large. That’s why I made Ganesha with plain clay..”

-Sutariya Mansi

Maahin Bharuchwala

Heritage Town, Surat.

Architectural assistantship department had organized webinar at Institute level on "Heritage Town, Surat." on 3rd October, 2020.

We were privileged to have Dr. Surendra Vyas (Ph.D., M.A., B.Arch.) as our Expert Lecturer. He is an Architect and Archiologist. He is Managing Director of Institute of Architectural Heritage and Cultural Antiquities. He explained about the heritage values of Surat city in a very unique way.

Orientation Program for 1st year

Despite of many challenges during this pandemic, our department has been conducting all academic activities very efficiently. With the same spirit and enthusiasm our department conducted Orientation program for 1st year students and their parents. We received overwhelming response and very good feedback during parents teacher meeting arranged for 3rd semester students, too.
